CRYSTAL TRUONG.

PRODUCT/UX DESIGNER

+61432159589 | crystaltruong26@gmail.com | crystaltruong.studio

Deeply passionate about simplifying complex services, I thrive on transferring my problem-solving frameworks to any complex challenge. With 4+ years of experience I'm skilled in end-to-end product design, design systems, and user testing, with a track record of driving measurable business outcomes. I'm always actively looking for ways to level up with forward-looking tool to design impactful, future-proof solutions.

EXPERIENCE

RACV UX Designer

January 2022 - Present.

Current work (2025 - Present)

- Adopted AI tools into research, prototyping and showcasing to bring richer, realistic experiences increasing engagement of designs and gaining more accurate data.
- Initiated and led the end-to-end design of RACV Car Match's conversational AI platform, transforming complex data tables into an intuitive LLM experience that streamlines vehicle research and drives high-intent cross-selling across RACV's product ecosystem.
- Designed foundational frameworks for AI trust, transparency, and conversational UI safeguards, establishing patterns that ensure accurate information delivery and minimize friction during critical research journeys.
- Designed self-service digital workflows with engineering, product, and business stakeholders to deliver RACV's core product Roadside Assistance across iOS and Android, simplifying high-stress, critical user journeys and migrated call centre interactions to digital services, driving a projected $2M+ in annual revenue and increasing app downloads by 30%.
- Led capability workshops across the team to improve design operations, sharing frameworks on integrating AI into everyday design workflows to increase team velocity and quality.

Previous work (2022 - 2024)

- Designed and launched Car Match platform, enabling users to research vehicles and connect with dealers seamlessly. Continuing further enhancing the platform increasing visits by 60%.
- Created and documented design system components in Figma and Zeroheight to ensure consistency, WCAG accessibility, and ease of development.
- Member portal
  - Contributed to the redesign of RACV's website and Salesforce portal.
  - Led end-to-end redesign of portal flows (payments, product, documents), driving a 60% increase in logins within 6 months.

SKILLSET

Design & Prototyping: Figma
Research & Testing: Lookback, Askable, Miro
Systems & Documentation: Zeroheight, Confluence, Jira, AEM
AI tools: Cursor, Cowork, Claude code

EDUCATION

Monash University

Bachelor of Software Engineering (Honours)
